CSS to keep element at "fixed" position on screen

I'm looking for a trick to create a "fixed" HTML object on the browser screen using CSS. I want it to stay in the same position all the time, even when the user scrolls through the document. I'm not sure what the proper term for this is.

It would be like the chat button on Facebook or the Feedback button that is on some websites that follows you throughout the page.

In my situation, I want to keep a div at the absolute bottom-right corner of the screen at all times. Sample CSS appreciated.

html   css

You may be looking for `position: fixed` .

Works everywhere except IE6 and many mobile devices.

1   But have you tried using jquery for it? – Michael J. Calkins Aug 22 '15 at 19:23

1   @MichaelJCalkins I have, and it was awesome! – Pekka 웃 Aug 22 '15 at 19:24

The easiest way is to use `position: fixed` :

```
.element {
  position: fixed;
  bottom: 0;
  right: 0;
}
```

http://www.w3.org/TR/CSS21/visuren.html#choose-position

(note that position fixed is buggy / doesn't work on ios and android browsers)

user1385191   mreq
                                mq **4,050**   3   25   50

+1 for the note about iOS and Android! – Pekka 웃 Sep 27 '11 at 23:00

Make sure your content is kept in a div,Say divfix.

```
<div id="divfix">Your Code goes here</div>
```
